Quantum Mechanics

June 2017

The studies of quantum physics were brought to my attention by several colleagues.

Once I saw that the site was a religious site I decided to not pursue it.

However recent new developments

including the reverse nature of time and the determinism

that is clearly present in the quantum Realm

was so puzzling that I decided to listen.

I was astonished.

The speaker gave very clear and reasonable explanations for all of these phenomena.

I, in turn, am recommending these studies to my colleagues.

The religious aspect is actually presented in an interesting and enjoyable manner.

Berlin, Germany

{Quantum Mechanics lessons are listed in the Index under "Science"}

July 2017

The quantum mechanics studies were recommended to me many times
but I refused to listen because I have an aversion to religion.

However, many new developments are frankly troubling.

So I, in near desperation, began to listen.

I was stunned.

The speaker presented the only rational explanations I have ever heard about
time moving backwards,

quarks not really existing until they are observed.

Amazing. The religious aspect is actually refreshing and interesting.

Munich, Germany

August 2017

The quantum mechanics presentations could not be more timely.

Remarkably, all of the distressing anomalies in the quantum realm are described and,
for the first time of which I am aware,

reasonable explanations are provided.

Based on this I am taking seriously the spiritual messages contained herein.

Nuremberg, Germany

The quantum mechanics lectures are phenomenal.

The principles described accurately explain
the bizarre phenomena one continues to observe.

Amazing for a Bible teacher.

Meyrin, Switzerland

THE RAPTURE

Leaving the Shadows for Reality

Are we merely characters in a virtual reality game?

The speaker has incredibly grasped and clearly explained the new
"disturbing" revelations about the world of quantum mechanics.

More remarkably, he has offered solutions which
initially were not appealing because of the religious content.

However I admit that his explanations are the only ones I've heard which are plausible.

I have begun to explore the many studies on this site
and find them to be very interesting.

Geneva, Switzerland

For more on CERN and quantum mechanics/physics,

may I recommend Anthony Patch for your consideration?

He has been studying the largest, most expensive most powerful machine

in modern history at Geneva otherwise known as CERN

for almost 30 years!

He is also a confessed believer.

Most of his material can be found on YouTube.

(Btw, Mr.Tatum, I believe your information should receive greater exposure!

Please consider creating a YouTube channel.)

Grace and peace

Winnipeg, Manitoba, Canada

I have been devoted to this site for many months and enthusiastically

await and listen to every new lesson.

The lesson on this universe being presented as a virtual reality was striking to me

since that is my field of endeavour.

As I listened, everything this teacher has taught me converged.

Also everything he has taught me converged with my scientific study.

I felt that light shined suddenly into my life.

Every part of my life as I trusted in Jesus as my savior.

Now the universe makes sense because it has purpose and meaning.

Tokyo, Japan
