Thank you for delivering the gospel and introducing me to the critical text.

Any news on a translation of that document from Greek to English?

And, if so, any way we can help?

Grace and peace :)

Hello Rob!

Thank you for all of your encouraging messages over the years.

As for the critical text, the situation is almost unbelievable. All of the work that was expended to discover the original New Testament words -- work that goes back generations and culminating in the late 20th century - and yet the restored New Testament has never been translated into any language.

Obviously the good news is that the exact inspired words in the autographs have been recovered for those of us who access the critical text.

I was considering translating the NT critical text into English myself in the 1990's but there was no interest. Bruce Metzger warned me there would not be any but I did not believe him at the time.

One point is that the handouts that are offered with each Radical Grace audio lesson contain corrections based on the critical text (as well as Rahlf's Septuagint for the Old Testament). Combining those handouts would be a start!

Should anything change, we will let you know.

Johnny
